PROFESSIONAL SUMMARY

Cybersecurity professional with hands-on experience in Red Teaming and Vulnerability Assessment & Penetration Testing (VAPT), along with L1-level exposure to Blue Team operations and cybersecurity networking. Skilled in PTES-aligned security assessments, web application testing (SQL Injection, XSS, CSRF, SSRF, XXE), and vulnerability reporting using tools such as Metasploit, Burp Suite, Nmap, and Wireshark. Currently contributing to Red Team and Bug Bounty initiatives as part of an extended internship at Sennovate Inc. Seeking to apply strong technical expertise and a proactive learning approach to strengthen organizational security posture.

PROFESSIONAL EXPERIENCE

Cyber Security Intern (Offensive Security) — SENNOVATE INC

March 2026 – August 2026

- Contributed to Centre of Excellence (COE) initiatives by preparing VAPT project initialization documentation and developing Red Team engagement questionnaires.
- Conducted comparative analysis of External Attack Surface Management (EASM) and Red Team tools to support methodology selection.
- Performed web application security assessments covering SQL Injection, XSS, CSRF, SSRF, XXE, and access control vulnerabilities.
- Worked on EASM and OS administration through client COE projects, supporting Red Team engagement readiness.

Offensive Security Trainee — BCBUZZ TECHNOLOGIES PVT LTD

July 2025 – November 2025

- Practiced PTES-aligned VAPT and security auditing covering reconnaissance, enumeration, exploitation, and reporting.
- Performed web, infrastructure, and WordPress security testing to identify vulnerabilities and misconfigurations using Nmap, Gobuster, Burp Suite, Metasploit, and Wireshark.
- Documented findings with risk impact ratings and remediation recommendations for client-facing reports.

Information Security Intern — OZONE CYBER SECURITY

October 2023 – December 2023

- Practiced Linux commands for system navigation, file handling, and security operations.
- Performed reconnaissance, target enumeration, and information gathering as part of VAPT activities, applying TCP/IP, ports, protocols, and DNS concepts.
- Used Metasploit for basic exploitation and attack workflow analysis, and analyzed network traffic using Wireshark to identify vulnerabilities and troubleshoot connectivity issues.

EDUCATION

B.Sc. Digital and Cyber Forensic Science — RATHINAM COLLEGE OF ARTS AND SCIENCE, COIMBATORE, INDIA

2023 – 2026

Higher Secondary Certificate (HSC) — CMS MATRIC HIGHER SEC SCHOOL, COIMBATORE, INDIA

2021 – 2023

PROJECTS

AD-Recon-X (Active Directory Reconnaissance & Security Assessment Tool)

- Built an Active Directory security assessment tool for domain reconnaissance and attack surface analysis, enumerating users, groups, systems, and privileges to identify misconfigurations and potential attack paths, with remediation recommendations.

Vishing Detector – Voice Phishing Detection

- Developed a security tool to identify and analyze vishing attempts based on predefined indicators and behavioral patterns, improving detection of social engineering attacks.

Phishing Detection – Browser Extension

- Developed a browser extension to identify and flag phishing websites by analyzing URLs and common phishing indicators, improving user awareness and preventing credential theft.

Capstone Project – WordPress Content Delivery Network Auditing (BCBuzz Technologies)

- Conducted a security audit of a WordPress application integrated with a CDN, following VAPT and PTES-aligned auditing practices to identify misconfigurations, exposed services, and common web vulnerabilities, with documented remediation recommendations.

SKILLS & TOOLS

Security: VAPT, Network Security, Web Application Security, Vulnerability & Risk Assessment, Security Reporting

Offensive Tools: Metasploit, PowerShell Empire, Burp Suite, Hydra, WPScan, Nikto, Hashcat, John the Ripper, SQLMap

Blue Team (L1): Threat Hunting, Splunk, VirusTotal, Endpoint Protection, Threat Protection, EDR, ELK

Networking: TCP/IP, HTTP/HTTPS, Subnetting, IPv4/IPv6, Wireshark, T-Shark, TCPDump, RDP, SSH, SMB

Platforms & Scripting: Red Hat Enterprise Linux, Kali Linux, Fedora, OS Administration

CERTIFICATIONS

- eJPT – eLearnSecurity Junior Penetration Tester (INE) — September 2025
- Pentesting Fundamentals — IT Masters — August 2025
- Digital Forensics Essentials — Security Blue Team — July 2024
- Web Application & Penetration Testing — Taggart Institute — July 2025
- OWASP Top 10 — The Linux Foundation — July 2025
- Junior Penetration Tester — TryHackMe — October 2025
- Certified Network Security Practitioner — The Sec Ops Group — November 2025
- Security Operations Center – L1 — TryHackMe — December 2025
